How to Use Eye Drops Properly

(Using a mirror or having someone else give you the eye drops may make this procedure easier.)

- 1. Wash your hands thoroughly with soap and water.
- 2. Check the dropper tip to make sure that it is not chipped or cracked.
- 3. Avoid touching the dropper tip against your eye or anything else eye drops must be kept clean.
- 4. While tilting you head back, pull down the lower lid of your eye with your index finger to form a pocket.
- 5. Hold the dropper (tip down) with the other hand, as close to the eye as possible without touching it.
- 6. Brace the remaining fingers of that hand against your face.
- 7. Gently squeeze the dropper so that the correct number of drops falls into the pocket made by the lower eyelid.
- 8. Close your eye for two to three minutes. Wipe any excess liquid from your face with a tissue.
- 9. Replace and tighten the cap right away. Do not wipe or rinse the dropper tip.
- 10. Wash your hands to remove any medication.

REMEMBER:

Follow instructions carefully
Do not miss doses
Use the exact number of drops recommended
Store medications out of reach of children
